Education

Karunya Institute of Technology and Science | May 2021– Present
Bachelor of Electronics and Communication Engineering | *Coimbatore, Tamil Nadu*

Technical Skills

Languages: Java, C, HTML/CSS, JavaScript, SQL
Developer Tools: Postman, Git, VS Code, Eclipse, IntelliJ
Technologies/Frameworks: React , MongoDB, Node.js, Express.js, Mongoose, Tailwind CSS, GitHub

Experience

VoltofCodes | Jan 2024 – February 2024
Web Development Intern | *Delhi, India (Remote)*

- Built a dynamic task management app with React hooks for efficient state management and local storage integration.
- Styled the application with Tailwind CSS to create a modern, responsive UI for optimal user experience.
- Ensured cross-browser compatibility and tested for seamless performance across devices.
- Uploaded the project to GitHub, demonstrating proficiency in React.js, front-end development, and version control.

CodeSpeedy Technology Private Limited | Jun 2023 – July 2023
Java Software Developer Intern | *Kolkata, India (Remote)*

- Developed applications for data validation, hotel room booking, and secure ATM management using Java and JDBC.
- Gained hands-on experience with MySQL, regex, and exception handling.
- Demonstrated proficiency in Java programming and database integration through project documentation on GitHub.

Projects

Product catalog | *React, Tailwind CSS, MongoDB, Express.js, Mongoose, Postman, Git and Github* | May 2024

- Designed and executed a customer request feature to increase user engagement by allowing customers to provide information such as name, phone number, and location for help.
- Developed a secure admin authentication system with email and password access, ensuring only authorized personnel can manage customer data.
- Built an intuitive admin dashboard to display and manage customer requests, enhancing operational efficiency.
- Leveraged the MERN stack (MongoDB, Express, React, Node.js) for end-to-end functionality, showcasing both front-end and back-end development skills.

One-To-One Application | *Java, Spring Boot, MySQL, RESTful API* | January 2024

- Developed a CRUD application with Spring Boot, focusing on one-to-one entity relationships between `User` and `AadharCard`.
- Created RESTful API endpoints for adding users and testing functionality.
- Utilized Spring Data JPA for repository management and MySQL for data persistence.
- Applied Lombok for code efficiency and documented the project on GitHub, demonstrating proficiency in Spring Boot and database management.

Certificates

Introduction to Front-End Development | Meta

Programming in Java | NPTEL

Version Control | Meta

Full Stack Development Workshop | IIT
